KEMSOL ULTRA

SANITISER

PRODUCT INFORMATION

- LOW COST-IN-USE
- CONCENTRATED FORMULA
- MULTIPURPOSE
- FOR COMMERCIAL USE
- EFFECTIVE SANITISER

Ultra Concentrate

Food-contact surface no-rinse sanitiser. Designed to be diluted either automatically through a wall mounted dilution unit or manually with a plunger device.

DIRECTIONS

Before sanitising ensure all surface are cleaned with suitable detergent. Dilute with cold potable water into a clean applicator bottle.

No-rinse application:

This product may be used as a no-rinse sanitiser on clean hard surfaces. Before use, all edible product and packaging material must be removed from the room or carefully protected. After use, a rinse with potable water is not required but food contact surfaces must be thoroughly drained / dried to minimise residues. For hard surfaces and equipment to ensure 200ppm use at the ratio of 1:399 (0.25% solution, 2ml per 750ml). Apply by spray or clean cloth, Allow contact time of minimum 10 minutes.

Rinse applications:

Use at the ratio of 1:199 (0.5% solution, 4ml per 750ml, 400ppm). Apply in a manner that avoids food contamination. Allow contact time of 10 minutes minimum then rinse with clean, potable water.

Foot bath:

Dilute at the ratio of 1:99 (1% solution, 8ml per 750ml, 800ppm).

It is recommended to do test strip verification of diluted solutions to ensure desired concentration.

MPI APPROVAL

MPI APPROVED C43 (All animal product except dairy) In the case of operators that only process fish, rinsing after application of this product is not necessary, however food contact surfaces must still be thoroughly drained to minimise residues. For all other operators, food surfaces must be thoroughly rinsed with potable water before production starts.

MPI APPROVAL

MPI APPROVED C101-87

This product may be used as a no-rinse sanitiser on clean hard surfaces. Before use, all edible product and packaging material must be removed from the room or carefully protected. After use, a rinse with potable water is not required but food contact surfaces must be thoroughly drained / dried to minimise residues.

GOOD PRACTICE

Under Good Practise Protocol, based on accepted international research, a 0.5% solution of this product, diluted with potable water, is recommended with liberal application on clean hard surfaces, with a minimum contact time of 10 minutes. At this concentration the product provides 400ppm.
