## MOSS-KILL

## PRODUCT INFORMATION

CLICK & SPRAY

LONG LASTING ACTION

CHLORINE, PHOSPHATE AND ACID FREE

ECONOMICAL

PROGRESSIVE CLEAN

BIODEGRADABLE

DOUBLE STRENGTH FORMULATION

## Algae Mould Moss & Lichen Control

Easy to use and effective agent that controls moss, mould, mildew, lichen and algae growing on most exterior hard surfaces and surfaces including paths, driveways, decks, building exterior, fences, roofs, solar panels and more. Suitable materials to apply Moss-Kill to include concrete & masonry, brick & pavers, stones, metals, plastics, stucco, tiles, timber & hard wood (painted or unpainted), vinyl & canvas.

### DIRECTIONS

1. Ensure the RED and BLACK valves are in the OFF (vertical) position.
2. Connect garden hose connector to spray head and turn the water on.
3. To start the spray applicator water flow, turn the RED valve (anti-clockwise) to ON (horizontal) position.
4. To activate the spray applicator, turn the BLACK valve (anti-clockwise) to (horizontal) ON position, then apply to desired area.
5. Ensure you completely wet the surface you are applying the treatment to. For best results, allow a dry contact time of at least 3 hours with no rain expected for 12 hours. Avoid applying in hot periods to minimise evaporation or on plant foliage. Some painted surfaces may require a rinse to avoid streaking.
  - Moss-Kill works overtime and can take up to 6 - 8 weeks to show any sign of decay. Heavily contaminated surfaces can take longer to come clean.
  - Scrubbing is not required but to allow the rain to do the rinsing for you, surfaces must be exposed to the elements.
  - Moss-Kill 2.5L bottles can be refilled using Moss-Kill 5L (reorder code FK-MOSKI05).

### SAFETY

- Read and follow the instructions carefully.
- Keep out of reach of children.
- Keep pets away until the treated area is dry.
- Do not breathe mist, vapours or spray.
- Wear protective clothing, gloves and eye/face protection.
- Wash hands thoroughly after handling.

## CHEMICAL SOLUTIONS SUSTAINABILITY POLICY

We are committed to continual improvement in our environmental performance, and have established a number of goals and initiatives helping achieve this objective. Where possible we always use biodegradable raw materials and all our finished product packaging is reusable or recyclable.

This is only a start, we continually strive to better our environmental performance.
